BALL JOINT /
RING EYE ARE
AVAILABLE

INTERPUMP
World leading technology

INCLUDED :

- 20 Metres High Pressure Hose
- Heavy-Duty Lance and Trigger
- Suction Filter Pipe
- Chemical Induction Pipe
- Hose Reel

Our range of road tow-able bowser pressure washers come with two pressure options, 2500 PSI / 170 Bar or 3000 PSI / 200 Bar and can have a Honda Petrol or Yanmar Diesel engine as their power source. Fitted with a direct drive interpump pump unit or a 2:1 reduction gearbox on the 3000 PSI / 200 Bar options, these pumps are widely recognised throughout the industry for their durability and quality. With a water flow rate of 15 litres per minute and a water bowser capacity of 250 Gallon / 1100 litres of water, you will have plenty of cleaning time which makes mobile pressure washing easy especially when a water source might be difficult. An optional ball joint or ring eye are available dependant on your towing set up for the road trailer.
